## AFFAIRS IN GEORGIA.

## WHAT THE PEOPLE OF THE STATE ARE DOING.

Departure of a Swell from Quitman—A Woman-Shooter Sentenced in Leesburg—Fire in Los Angeles—A Negro Fight near Augusta—A Distressing Accident—A Raid on Distillers.

By Mail and Wire to the Constitution.

QUITMAN, November 21.—Superior court, after a two weeks session, adjourned on Saturday last. The two murder cases resulted in sentences to the penitentiary—one for eight years, under a plea of guilty of voluntary manslaughter, and Jack Colvin, (colored), for life, having been found guilty.

The auriferous territory of this state was largely obtained from the Indians by treaty some forty five years ago, and the mineral portion was divided for the most part into lots of 40 acres, with lines running north and south, east and west. This method of division has greatly facilitated work in many respects.

Gold was discovered in Georgia at about the same time as in the Carolinas—in 1828-31. For twenty years the ravines, and particularly the streams, where nature had concentrated the gold in the course of ages, gave opportunity for the most profitable work. The exhaustion of this readily worked ground led to attempts to work the veins. The rich parts of them allowed profitable work a little while longer, but mining in Georgia was for many years relatively unprosperous.

Before the late war, the necessity for larger supplies of water for the treatment of the mineral bodies had become so evident that distilleries were organized for this purpose. The disastrous industrial effect of that struggle was so great that the benefits of these supplies were not properly utilized till quite recently.

During the last five years gold mining has been placed on a firmer basis, for the possession of bodies of ore whose locality, extent and richness were easily ascertained, together with a sure supply of water, removed the subject to a great extent from the region of probability and made it more of a certainty.

The most efficient methods of treatment have been pretty well settled, varying at different points only as the different circumstances compel a change, and usually only in minor particulars.

The skillful and energetic efforts of a few men prominent in mining matters in this section have determined the conditions successful work apparently the efforts of the future will be directed to the perfecting of the details, so as to secure such an extraction of the precious contents as is consistent with the least cost.

The ore is of very low grade. I could not learn that any effort has been made to ascertain exactly the average value of the ore, but from a comparison of all the information obtainable, I am inclined to put it at not more than \$1.25 to \$1.50 per ton, although in every mine chances may be met at any value which would justify its being worked.

The Pigeon Roost and the Findley are the two great mines of this section, and at both the production has been large. The Pigeon Roost, especially well opened and provided with the best appliances to secure economy and efficiency. It is operated by a turn-out, so that the cost of working is extremely small. It is situated on the Pigeon Roost or Sand Belt which is regarded generally as the richest of this section. The mine is a fairly well opened. The yield in 1879 was \$5,000. The returns for 1880 had not been received at my visit, but the superintendent assured me that these figures were fully maintained. The Findley mine is also well opened and provided with ample mining ground to supply its large output, of which it has two, provided with fifty stamps in all its production is but little behind that of Pigeon Roost, but no statement could be furnished. Of the other smaller companies about one-half are in condition for effective work, notably the Cleveland, the Lighttown, the Clay and Georgia, the Troy and the Hart. Others have just commenced work, and nothing certain can be said respecting them. A very few are confessed failures, but there is a less proportion of this class than in other sections.

In Dawson county a few mines are now opening, but the work of production at present is confined to individual miners, who prosecute their work at times of leisure, rather than as an exclusive business. A similar statement may be made regarding Hall and White counties. In the latter county, has been the most noted and one of the most prolific, but at present, as reported to me, out of work and in litigation.

The Lumsden mine has, during the year, yielded a large number of interesting specimens. Other mines are the Sprague, the Lewis, and the Reynolds.

The production of White county is estimated to be about \$15,000 per year. The production of Dawson county is given by E. W. Hall, of Dahlonega, at \$10,000. As he has unusual facilities for information in such matters, I have taken his figures for my guide.

The tendency in this state has been to form too small companies; a mill of ten stamps will pay expenses if it is properly planned and economically administered, but it rarely has much about this for profit, for the cost of operating a ten-stamp mill is much greater proportionately than for one provided with twenty stamps.

The prime necessity here is a large establishment provided with the requisite facilities for the treatment of large bodies of ore. Mining ground is held at moderate rates, and the necessary machinery can be obtained at very moderate prices. I can give one instance where the entire cost of mine, ditches, water works, buildings and cost of opening was less than \$17,000.

The future of Georgia mines seems to me to be well assured, and modest profits reasonably certain. I think that the production of 1880 will be fully maintained in 1881, if not somewhat increased. The production of Georgia in 1880 has been variously estimated, and I take up the matter with some hesitancy, at one-third of the companies I have alluded to have made full or approximate returns of their production. So far as given it amounts to \$9,880 in Lumpkin county. The yield of the mines not reported is from the best information at my command, \$7,000; to this must be added the production of White and Dawson counties, viz: Lumpkin county (reported and estimated), \$9,880; White county (known), 10,000; White county (estimated), 5,000; Dawson county (estimated), 10,000.

The first two enumerated items and the last would naturally seek an outlet in great part at Gainesville, the nearest railroad and express point; the nearest city from this point is Marietta, and to December 31st, 1880, were \$41,775. The express agent thought that one-eighth of the production of Lumpkin county would be found its way to Gainesville by private hands. This would indicate a production for these counties of \$8,000 per month.

I think the above calculation may be far from correct—rather under than in excess of the entire amount produced.

The gold produced in White county finds an exit at Mount Airy usually.

Wishing for Death. Since my return from the army I have suffered with severe pains in my lower limbs, which at times totally unfitted me for any kind of business; and at other times the pain was so severe that I wished for death to relieve me of my sufferings. After having tried the best physicians and various well known remedies without benefit, I procured a bottle of St. Jacobs Oil, which relieved the pain instantly.

Salamanca, N. Y.

The brigand Bandazzo, alias Exposito, has been sentenced to hard labor for life at Palermo, Sicily.

Seekers After Health. Enquirer. Unfortunately those who are seeking to renew their health are many. So often have they been deceived by the advertisements of worthless compounds, that many are discouraged, and refuse to believe anything they read in the papers. Therefore, the best advertisement of a really good medicine is the reputation it has gained in places where it is being sold.

No other remedy ever discovered has grown so rapidly in public favor as that true medicinal tonic called Brown's Iron Bitters. In localities where its extraordinary merits have become fully known and realized by those who have been in ill-health, the sale is unprecedented. One drugstore in our city reports the sale of 238 bottles in one week. It is, indeed, a wonderful, health-giving, life-saving preparation and the best of all.

It is refreshing and refreshing in its effect, and strengthens every part of the body, and creates healthy appetite and digestion, even when the system is almost destroyed by the many harmful cathartics so commonly used. Reader, beware! But I demand that you try Brown's Iron Bitters, if your health is poor from any cause.

nov29 d&wlv

Genius finds new ideas, wit ridicules them and common sense adopts them.

Taxation May. The tonic effect of Kidney-Wort is produced by its cleansing and purifying action on the blood. Where there is a gravelly deposit in the urine, or milky,ropy urine from disordered kidneys, it cures without fail. Constipation and piles readily yield to its cathartic and healing power. Put up in dry vegetable form or liquid (very concentrated), either can be prompt and sure.—Troy Budget.

ST. JACOB'S OIL.

**ST. JACOB'S OIL**

TRADE MARK.

**THE GREAT GERMAN REMEDY FOR RHEUMATISM.**

Neuralgia, Sciatica, Lumbago, Backache, Soreness of the Chest, Gout, Quinsy, Sore Throat, Swellings and Sprains, Burns and Scalds, General Bodily Pains, Tooth, Ear and Headache, Frosted Feet and Ears, and all other Pains and Aches.

No Preparation on earth equals St. Jacobs Oil as a safe, sure, simple and cheap External Remedy. A trial test will but the comparative trifling utility of 50 cents, and every one suffering with pain can have cheap and positive proof of its efficacy.

Directions in Eleven Languages.

**KIDNEY WORT**

**KIDNEY WORT**

**DOES WONDERFUL WHY? CURES!**

Because it acts on the LIVER, BOWELS and KIDNEYS at the same time.

Because it cleanses the system of the poisonous humors that develop in Kidney and Urinary Diseases, Biliousness, Jaundice, Constipation, Piles, or in Rheumatism, Neuralgia, Nervous Disorders and Female Complaints.

SEE WHAT PEOPLE SAY:

Eugene H. Stork, of Junction City, Kansas, says: "Kidney Wort cured my regular physician had been trying for four years."

Mrs. John Arnall, of Washington, Ohio, says: "Kidney Wort cured my husband's kidney troubles, and he was afterwards cured by Kidney Wort."

M. M. B. Goodwin, an editor in Chardon, Ohio, says: "I was not expected to live, being afflicted with kidney troubles, but Kidney Wort cured me."

Anna L. Jarrett, of South Salem, N. Y., says: "Kidney Wort cured my husband's kidney troubles, and he was afterwards cured by Kidney Wort."

John B. Lawrence, of Jackson, Tenn., suffered for years from liver and kidney troubles, and was cured by Kidney Wort.

Richard Cotto, of Montgomery County, Va., suffered eight years with kidney troubles, and was cured by Kidney Wort.

**KIDNEY WORT**

**PERMANENTLY CURES KIDNEY DISEASES, LIVER COMPLAINTS, Constipation and Piles.**

It is put up in Dr. Vegetable Form in the form of a small bottle, containing a quart of medicine. Also in Liquid Form, very Concentrated, for those who cannot swallow pills.

It acts with equal efficiency in either form.

**COTTON COMPRESS.**

**NEW MORSE COTTON COMPRESS.**

The Largest and Most Powerful Compress on the Earth.

With a Lifting Power of 3000 Tons.

THIRTY-FIVE have been built and erected in four years; and in this period twice as many as all other compresses, and in the last two years five times as many as all others combined in the United States, making the investment in the Morse Press over one million dollars in four years. 400,000 pounds of material are required for a single Compress, and only from a used of the best known materials. Their immense weight, strength and durability, make them in the end, the cheapest Compress to use, and the only one to meet the commercial demands of the present and future. Several of these firms built have now compressed from 400,000 to 500,000 bales cotton, without defect or perceptible wear. They have secured a density measured in the press of 75 pounds to the cubic foot.

**A FEW CHIEF MERITS.**

1. It is, in all respects, simplest in construction, and least liable to disorder or breakage.
2. It is a steam power, and works faster than any of the hydraulic presses and has no packings to give out, when delays would be ruinous.
3. It has fewer points in motion, and consequently less wear and friction than any other compress.
4. Its wedge-shaped rack and cycloidal sectors secure a progressive leverage, nicely adjusted to overcome the increasing density of the bale, as the platen is brought home.
5. Its superior power has reduced freight to a minimum, and wherever located, has made the business of compress working wonderfully successful, and at many interior points has doubled the receipts of cotton.

New Orleans alone has nine of these mammoth presses; Memphis, three; Houston, three; Norfolk, three; others at Mobile, Galveston, Breunham, Dallas, Fort Worth, Paris, Jefferson, Shreveport, Little Rock, Vicksburg, Meridian, Columbus, (Miss.), Selma, Wilmington, West Point, Va., Rome and St. Louis, and one may be seen daily at work in this city.
